INTRODUCTION

The program for studying the course “Strategies of Management” is compiled in accordance with the educational and scientific programme for training doctors of philosophy in the specialty “Management”. The course “Strategies of Management” belongs to the cycle of mandatory courses for training doctors of philosophy under the “Management” study programme.

Strategies of Management are a set of methods and tools used to manage an organization in the process of achieving goals. They include leadership strategies, administration, business management, etc.

Purpose of the course: mastering theoretical knowledge of strategic management, tools, methods of choosing strategies for the development of the organization and the acquisition of practical skills and abilities to use the concept of strategic management at an enterprise.

The tasks of the course are:

disclosure of the content of the categorical apparatus of strategic management;

study of models and methods of analysis of the internal and external environment;

study of various models of strategic management;

research of the strategic planning process, as well as the study of the strategic process;

mastering the skills of formulating, choosing and evaluating strategies taking into account the context of the environment;

study of strategic alternatives and methods of strategic analysis to substantiate the strategy;

studying the essence and structure of strategic potential, mastering the methods of its assessment.

The object of the course is strategic development of the organization.

The subject of the course is the theoretical concepts of management strategies, the methodology of developing and implementing the strategy of organizations.

The learning outcomes and competencies formed by the course are defined in table 1.

Table 1

Learning outcomes and competencies formed by the course

Learning outcomes	Competencies
LO04	GC04; GC05; SC01; SC04; SC05
LO05	SC04
LO07	GC04; GC05; SC01

where LO04. Develop and implement scientific and applied projects that provide an opportunity to rethink the existing and create new holistic knowledge and/or professional practice in the field of management and administration and to solve significant scientific and technological problems in management in compliance with the norms of academic ethics and based on social, ethical, economic, environmental and legal aspects;

LO05. Deeply understand the general principles and methods of management sciences, as well as the methodology of scientific research, apply them in one's own research in the field of management and in teaching practice; to know the content and functions of science as a social institution, the general laws of the development of science, the structure and levels of scientific knowledge; consciously formulate the problems and tasks of specific scientific research in the professional field; to have methodological techniques for proposing scientific hypotheses, their verification and building a scientific theory;

LO07. Approve and implement the results of own research in the field of management; to understand the content of modern management theories and the features of their evolution under the influence of changes in the external environment, advanced achievements and trends in the field of modern management, world experience of implementing existing management theories into the practice of modern enterprises;

GC04. The ability to solve complex problems in the field of management based on a systematic scientific worldview and a general cultural outlook in compliance with the principles of professional ethics and academic integrity, to develop, plan and implement research and innovation projects and programs in the field of management;

GC05. The ability to find one's own ways to solve a problem, critically perceive and analyze other people's thoughts and ideas, review publications and abstracts, conduct a critical analysis of one's own materials;

SC01. The ability to perform original research, achieve scientific results that create new knowledge in management and related interdisciplinary areas; to have information about the directions and features of the development of modern theories of management and promising achievements in the field of management; organize and conduct research and innovation activities;

SC04. The ability to initiate, develop, implement and manage scientific projects in management and related interdisciplinary areas and/or make proposals for financing scientific research, registration of intellectual property rights; to introduce innovative results of scientific research in the field of management into the practical activities of modern enterprises, institutions, and organizations;

SC05. The ability to use the latest information technologies and tools, progressive software products, the possibilities of the global Internet network in the process of producing new knowledge, obtaining scientific and practical results in the field of management and in teaching practice.

COURSE CONTENT

Content module 1. Methodological basics of strategic management

Topic1. Strategies of management: essence and features.

The essence and content of management strategies. The concept of strategic management. Prerequisites for the formation of a strategic management system. Objects and problems of strategic management. The concept of strategic management centers. The relationship of the main elements of strategic management. Methodological approaches to strategic management. The main components of the strategic management system. Characteristics of the stages of the strategic management process. Approaches to determining the components of the strategic management process.

Evolution of strategic management.

Experience and problems of using the enterprise management system in Ukraine.

Topic 2. Strategic management models.

Characteristics and types of management systems in a changing environment. Ranking of managerial tasks in strategic management.

Deviant and preventive nature of the enterprise management system. Management based on control. Management based on extrapolation. Management based on anticipation of change. Management based on flexible emergency solutions. Management by ranking strategic objectives. Control of weak signals. Management in conditions of strategic surprises.

Modern models of strategic management: rational and alternative (limited rationality, incrementalism) models.

Topic 3. Strategic planning in the system of enterprise strategic management.

The essence and features of strategic planning, strategic planning versus long-term planning. Principles of strategic planning. The importance of enterprise strategic planning in a changing environment. Approaches to the organization of enterprise strategic planning.

Strategy as a set of rules for decision making. Levels of strategy in the system of strategic management. Classification of strategies. Approaches to strategy formation.

Strategic planning process. Stages of strategy development and implementation. Areas of strategic planning.

Topic 4. Strategic analysis of the enterprise and the choice of strategic positions.

Analysis of the external environment. Indirect environment. Direct Environment. Analysis of the competitive environment. Key success factors.

Analysis of the internal environment. The effectiveness evaluation of existing strategies.

Models and methods of the external and internal environmental analyses in the system of strategic analysis of the enterprise. Peculiarities of methodological tools in strategic analysis. Strategic information: types and sources.

Strategic analysis as a basis for determining the enterprise strategic position. The process of identifying the dominant competitive advantages of the enterprise, its position in the market. Strategic Management Areas: concept and characteristics.

The concept of strategic resource zone.

Models and methods of assessing the strategic position of the enterprise and the choice of strategic positions. Assessment of strategic flexibility (external and internal) and synergy.

Assessment of the enterprise competitiveness. Methods of assessing the enterprise competitiveness: based on the theory of effective competition, based on determining the competitiveness of goods, based on the theory of competitive advantage, the method of benchmarking.

Content module 2. Strategy development and its implementation.

Topic 5. Formation of strategic alternatives and strategy selection.

Strategic needs of the enterprise. Stages of strategy development: creating, proof, evaluation. Basic strategies. Generating strategic alternatives. The process of choosing an enterprise strategy. The concept of optimal strategy. Assess the factors that influence the choice of strategy. Evaluation of the chosen strategy. Features of strategy selection for small and medium enterprises. The process of identifying strategic alternatives for enterprise development. Analysis of strategic alternatives. Using basic strategic approaches to justify strategic alternatives for enterprise development. Formation of an enterprise strategies portfolio.

The structure of the strategic plan. Characteristics of the strategic plan sections.

Strategic control in the process of strategy implementation: essence, characteristics, varieties. The process of strategic control.

Criteria for the strategy's effectiveness. External and internal effectiveness of enterprise strategies. Indicators of strategy effectiveness.

Topic 6. Competitive strategies.

Types of competitive strategies. General characteristics of competitive strategies.

Cost leadership strategy. Factors that contribute to the use of cost leadership strategies. The benefits of a cost leadership strategy in terms of the five forces of competition.

Differentiation strategy. Possible sources of uniqueness of the enterprise and its products. Types of differentiation. Organizational requirements of the differentiation strategy.

General characteristics of the focus strategy. Conditions that contribute to the implementation of the focus strategy. Difficulties in implementing a focus strategy.

Topic 7. Development of functional strategies.

Functional strategies, their role in specifying the chosen development strategy and in achieving goals.

Marketing strategy, its main elements and possible approaches to its implementation.

Financial strategy, its main elements.

Innovation strategy. Simulation strategies. Components of innovation strategy.

Production strategy and its components.

Topic 8. Contemporary management strategies.

Modern concepts of strategic management. Features of the modern strategic management concepts.

Evolutionary and revolutionary development. Thompson-Strickland concept. The concept of a balanced scores system. Conceptual management approach.

Modern management strategies and their characteristics.

Management of changes. Change management approaches.

Topic 9. Management of the enterprise strategic potential.

The concept of the strategic potential. Elements of strategic potential: management system, quantitative and qualitative composition of resources, organizational projects, goals. Features of strategic capacity management.

Factors influencing the choice of enterprise's potential management strategy. Approaches to the formation of strategic potential.

General assessment of the enterprise strategic potential to identify opportunities for the implementation of a set of strategies.

The list of practical (seminar) studies in the course is given in table 2.

Table 2

The list of practical (seminar) studies

Name of the topic and/or task	Content
Topic 1. Practical task 1.	The evolution of understanding and predicting the future of organizations. Prerequisites for the application of strategic management in organizations.
Topic 2. Practical task 2.	The essence of strategy and set of strategic.
Topic 3. Practical task 3.	The essence and types of strategic planning.
Topic 4. Practical task 4.	Evaluation of the internal and external environment of the organization for the purpose of choosing a strategy.
Topic 5. Practical task 5.	Analysis of product strategy.
Topic 6. Practical task 6.	Types of competitive strategies and methods of their selection.
Topic 7. Practical task 7.	Analysis of functional strategies.
Topic 8. Practical task 8.	Assessment of competitiveness. Building profiles of competitiveness.
Topic 9. Practical task 9.	Development of measures to overcome resistance to changes during strategy implementation.

The list of self-studies in the course is given in table 3.

Table 3

List of self-studies

Name of the topic and/or task	Content
Topic 1-9	Search, selection and review of literature on a given topic
Topic 1-9	Preparation for the Express test
Topic 1-9	Preparation for practical classes
Topic 1-9	Performing a presentation
Topic 1-9	Preparing to the final control

The number of hours of lectures, practical (seminar) studies and hours of self-study is given in the technological card of the course.

TEACHING METHODS

In the process of teaching the course “Strategies of Management”, in order to acquire certain learning outcomes, to activate the educational process, it is envisaged to use such teaching methods as:

discussions (topic 1 – 9), presentations (topic 5 – 6), illustrations (topic 1 – 9), case studies (topic 3 – 8), work in small groups (topic 1 – 9), different individual (topic 1 – 9) and group tasks (topic 5 – 8).

During lectures and practical classes, the following teaching methods are used: explanatory and illustrative, reproductive, problem-based teaching, partially research-based, research teaching methods.

FORMS AND METHODS OF ASSESSMENT

The University uses a 100-point cumulative system for assessing the learning outcomes of students.

Current control is carried out during lectures and practical classes and is aimed at checking the level of readiness of the student to perform a specific job and is evaluated by the amount of points scored:

– for courses with a form of semester control as grading: maximum amount is 100 points; minimum amount required is 60 points.

The final control includes current control and assessment of the student.

Semester control is carried out in the form of grading.

The final grade in the course is determined:

– for disciplines with a form of grading, the final grade is the amount of all points received during the current control.

During the teaching of the course, the following control measures are used:

Current control: presentation of an individual task (project) (maximum score – 60 points); final control work (maximum score – 40 points).

Semester control: Grading.

More detailed information on the assessment system is provided in working plan card of the course.
